The license for this product includes *PERSONAL USE* and *COMERCIAL USE*.

You can modify this asset and artwork, redistribute or resel this asset or its content is prohibited.

## **First steps understanding the asset.**

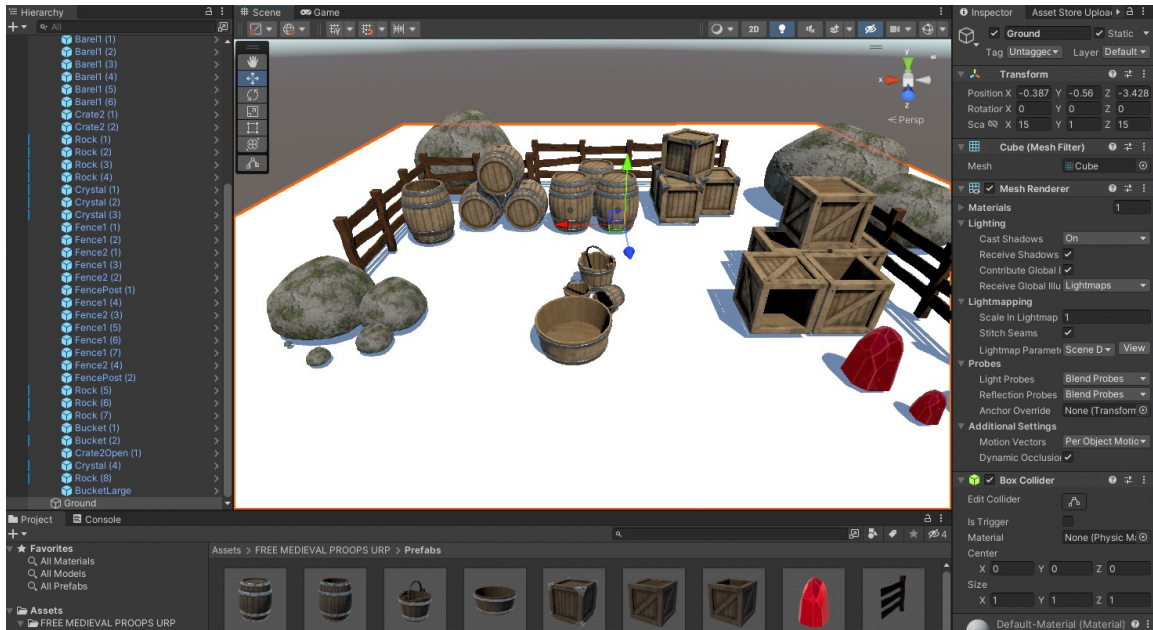

You will find a DEMO scene ready with all the PREFABS, MATERIALS, TEXTURES AND MESHES setup and ready to use.

The textures resolution is 2048x2048 (2k).

The filter mode is set up by default (Bilinear)

The compression is set up by default (Normal Quality)

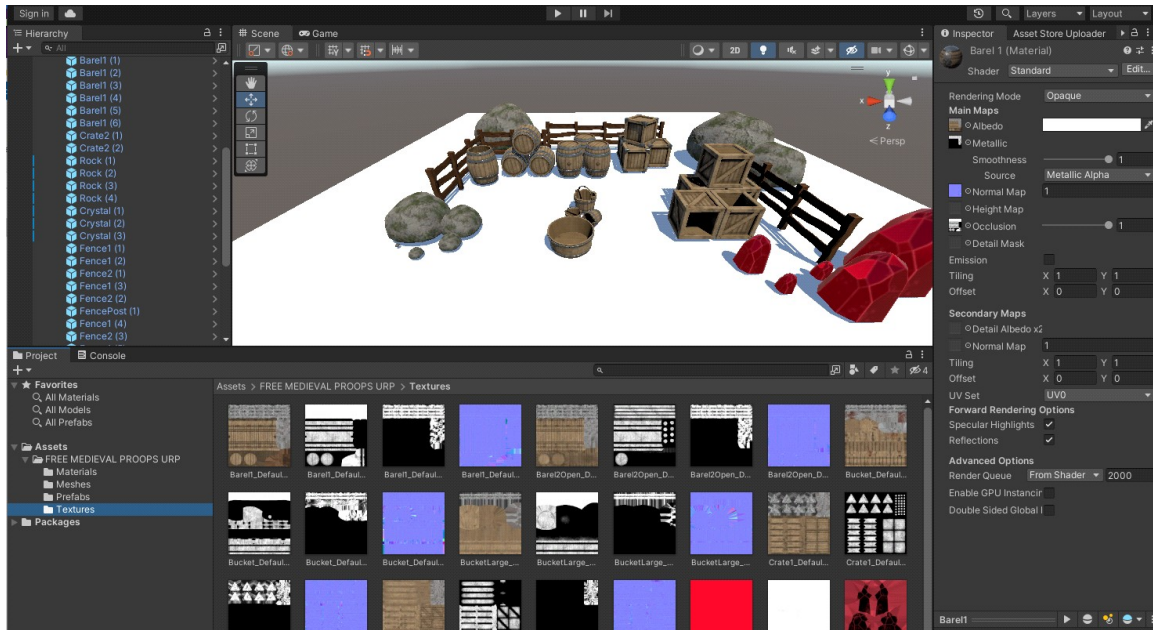

All the PREFABS have a custom mesh COLLIDER.

All the textures are exported in 2k resolution (2048x2048).

The textures namespaces are according to its MESH parent  
(OBJECT.fbx = OBJECT\_DEFAULTMATERIAL\_)

Some Meshes have a second MATERIAL with OPACITY separated to create translucent objects like GLASS and CRYSTALS  
(OBJECT2.fbx = OBJECT2\_MATERIAL = OBJECT2\_OPACITY)

## Textures Renderer compatibilities.

All textures and materials are compatible with:

- 0 Universal Render Pipeline.
- 1 High Detail Render Pipeline (Using the conversion window guide).
